

FOR IMMEDIATE RELEASE

The Quantitative Services Group LLC (QSG) Announces Enhanced Performance Reporting for its
Virtual Research Analyst® Stock Selection Platform

NAPERVILLE, IL, November 8, 2005 – QSG, a leading provider of systematic equity analytics for institutional investors, announced today the release a new set of monthly performance reporting and attribution tools for its Virtual Research Analyst® (VRA) web-based, stock selection platform.

“QSG has built its reputation on building customized stock selection models tailored to a client’s unique strategy and goals,” stated Tim Sargent, CFA, President and founder of QSG. “Analyzing a strategy’s power across various indices, within specific sectors and even at the individual signal level is an integral part of our clients’ investment process. These new tools will enable clients to easily communicate the power of their stock selection strategies to investment consultants and potential investors alike.”

“We designed these reports for the investment manager, portfolio manager and equity analyst,” added Bola Olusanya, Senior Quantitative Analyst and VRA Product Manager. “Portfolio simulation, a variety of return based statistics, even, information coefficients are all at a client’s fingertips,” Mr. Olusanya continued. “Clients can quickly print a complete set of performance reports with just the click of the mouse or have them automatically sent to them in email.”
